## Questioning Index

Prepared by		
Phenomenon or system		
Observations I notice...	Questions I wonder...	Investigable? (y/n)

Variables and/or important components of the phenomenon list them and describe their behaviors and or roles

I think...What would you observe if one of the variables listed above were to change? List the **variable**, describe **how it changes** and the **result** of that change

Variable write below (in very big letters)

Change predict what would happen at 2-3 different conditions of that variable

---

---

---

---

Evidence needed How could you test the predictions you made above? For each test, produce a simple system diagram of your different experimental setups.
